

American Society of
Agricultural and Biological Engineers

March 10, 2020

The health and safety of our members and conference attendees will always be our top priority.

At this time, the 2020 Annual International Meeting is proceeding as scheduled, as are section and student [events](#). Nevertheless, we are monitoring local, national, and international health authorities, including the [CDC](#) and [WHO](#), as the spread of COVID-19 evolves. Additionally, we are coordinating with our section and student volunteers to address the unique needs of their events, and we are in close communication with peer organizations to ensure we are considering every aspect of event planning and attendance.

[#ASABE2020](#) is still many weeks out, and we will continue to reassess plans as information emerges about COVID-19.

If it becomes prudent to adjust plans for any upcoming ASABE events, be assured that we will communicate changes clearly and promptly.

For those traveling internationally, we encourage you to consult the [US State Department website](#) for up-to-date advisories.
